

The Indiana Telephone Privacy Law (No-Call Law) has been one of the best pieces of legislation in this state in years. The unwanted, nuisance, calls to our household have dropped from about 24 each week to one or two. Do not water down the Indiana law with federal legislation which is inferior to that of this state. The federal law being proposed should, instead, be modeled after the Indiana legislation which was advanced by Attorney General, Steve Carter. Please do not let the federal law do less for us than our own state statute. It works!
